

3+1 consensus on the renormalised carrier-defect coupling $|g|$

Healing factor: $|g|_{\text{MS}} / |g|_{\text{tree}} = 0.8543 \approx \sqrt{0.524 / 0.718} = 0.8543$

The same factor is independently demanded by the cosmological-transport over-amplification on the second canonical regime; the three regularisation-distinct paths and the algebraic check agree inside a 5% band.
